

ALS 380

High speed labelling system

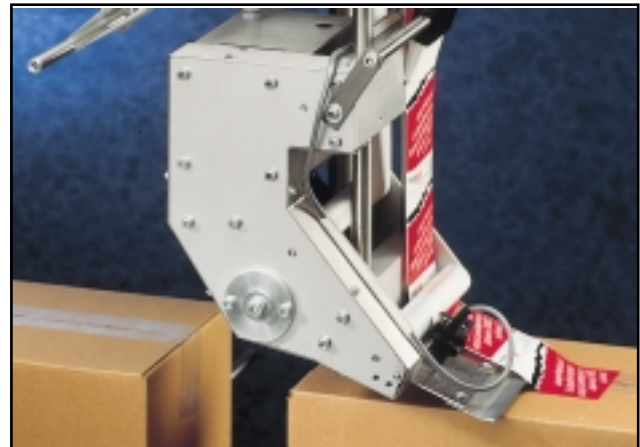

...Covering the World

ALS 380

Modern production lines demand high speeds, zero faults, safe working environments and flexible, multi production lines. These determine today's labelling equipment specifications. Avery's on-going-research into changing market requirements has identified a specific need now filled by the new ALS 380 labelling head.

A compact design in stainless steel materials available in right and left hand versions either of which will fit easily into your production lines. These new machine offers high levels of accuracy, flexibility and dispensing speed up to 1,000 labels per minute, depending on the label length.

The ALS 380 is driven entirely by an integral electronic circuit giving optimum labelling tolerances and high speeds together with acceleration capabilities to allow very small labels to be applied.

Fast speed labelling head for speed up to 100 m/min

Ideal to use for all multi product lines is the ALS 380, it can memorize up to 16 different product/label-combinations enabling the operator to adjust settings immediately. In addition, the ALS 380 can compensate for any missing label, ensuring faultness for any product. The automatic speed follower is standard on the new ALS 380, customized options like RS 232 interface connection and label web control can be

Technical Specifications ALS 380:

- Label width (incl. backing paper) 160mm
- Label length min. 10mm, max. 500mm
- Label unwind outside diameter max. 400mm
- Label core diameter 76.2 mm
- Backing paper rewind collapsible driven
- Label stop accuracy + 0.5mm
- Dispensing speed fix 2 up to 100 m/min, with APSF 0 up to 100 m/min
- mechanical executions right or left hand
- Drive system stepper and AC motor
- dimensions (W x H x D, in mm) 735 x 795 x 400
- Weight 70kg
- Power supply 110/220/240V +/- 10% (fuse size for all voltage levels 4A)
- Protection class IP41
